

# TracerBench: Boxplot Results

TracerBench on HeadlessChrome/83.0.4103.116

## duration (546 ms slower)

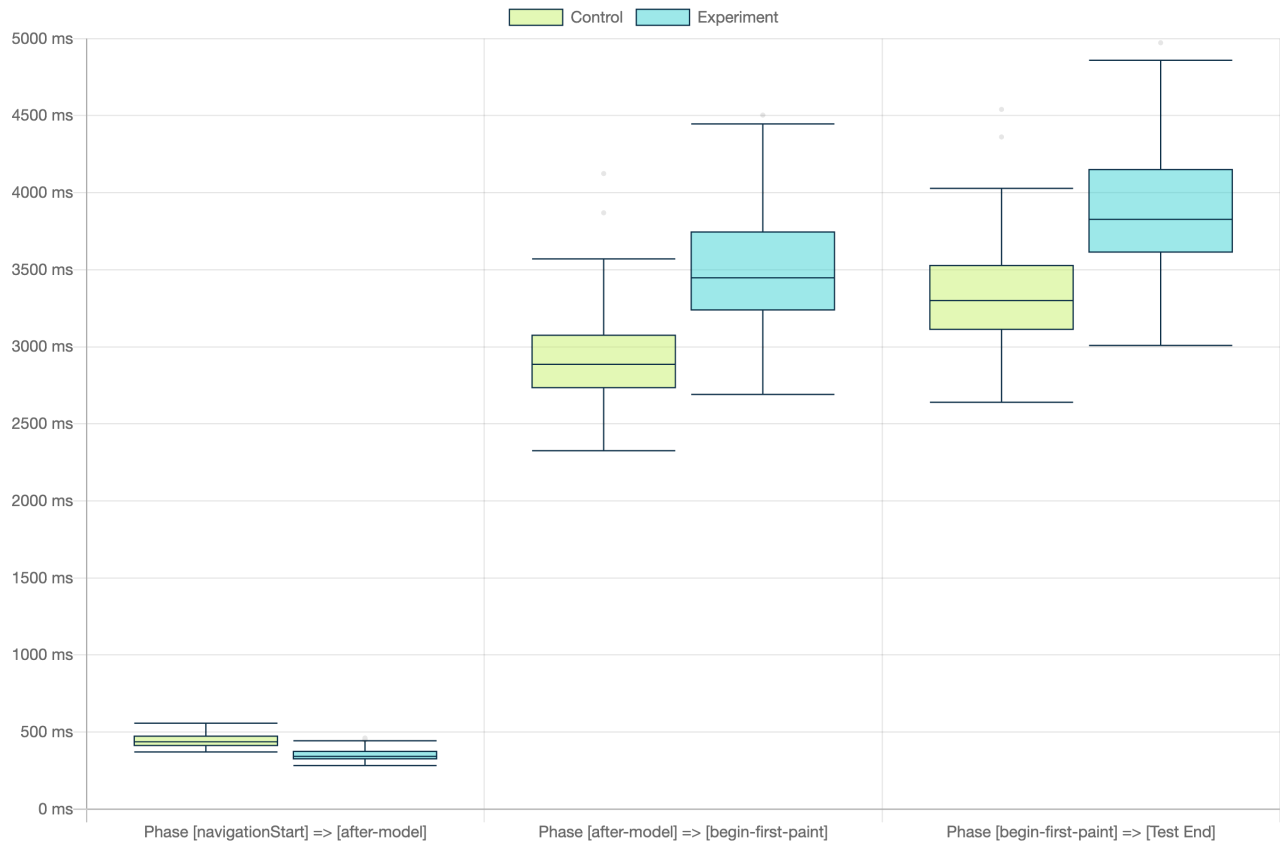

A statistical analysis test was used ([Wilcoxon Rank-Sum Test](#)) to determine that the results are significant meaning they are worth looking at. A statistics estimator ([Hodges-Lehmann estimator](#)) was used to determine "Experiment" is **slower** by **546 ms**. TracerBench is 95% confident it is **slower** between **401 ms to 701 ms** based on 50 samples using a [confidence interval](#).

## Sub Phases of Duration

The chart below shows the finish times (a point in the page load duration) of the sub phases for experiment and control. It gives a high level view on what also changed (if there are any).

You can view more details about the phases starting from page 2.

# Sub Phases in Detail

Sorted by phases that regressed with the most magnitude.

---

## Phase [navigationStart] => [after-model] (92 ms faster)

A statistical analysis test was used ([Wilcoxon Rank-Sum Test](#)) to determine that the results are significant meaning they are worth looking at. A statistics estimator ([Hodges-Lehmann estimator](#)) was used to determine "Experiment" is **faster** by **92 ms**. TracerBench is 95% confident it is **faster** between **77 ms to 108 ms** based on 50 samples using a [confidence interval](#).

---

## Phase [after-model] => [begin-first-paint] (644 ms slower)

A statistical analysis test was used ([Wilcoxon Rank-Sum Test](#)) to determine that the results are significant meaning they are worth looking at. A statistics estimator ([Hodges-Lehmann estimator](#)) was used to determine "Experiment" is **slower** by **644 ms**. TracerBench is 95% confident it is **slower** between **525 ms to 778 ms** based on 50 samples using a [confidence interval](#).

---

## Phase [begin-first-paint] => [Test End] (No Difference)

A statistical analysis test was used ([Wilcoxon Rank-Sum Test](#)) to determine that results are not significant.
